WHAT'S HAPPENING?

Is It

Real?

A magnifying glass with a black handle and a silver frame is positioned over the word 'Real?' in the phrase 'Is It Real?'. The magnifying glass enlarges the word 'Real?' and the question mark, making them the central focus of the image. The background is plain white.

In her opening remarks, **Henna Virkunen**, European Commission Executive Vice-President for Tech Sovereignty, Security and Democracy, stressed that with an investment of €100 million, the European Commission is developing an **advanced collaborative platform**. Its goal is to *"help develop faster, safer and more efficient treatments, delivering life-saving therapies sooner, and positioning Europe at the forefront of next-generation healthcare"*.

Policy vision and ethical foundations

Sandra Gallina, Director-General of DG SANTE, underlined the role of the European Health Data Space (EHDS), in relation to VHTs. EDHS is central to ensuring data quality, secure, ethical data access, and a framework that empowers citizens to control their data whilst enabling researchers and innovators to transform this data into improved public health outcomes. **Lucilla Sioli**, Director of the AI Office at DG CONNECT, emphasised that the Virtual Human Twins (VHTs) Initiative represents *"a game-changer for Europe's healthcare systems, not only with the potential to share and validate results, connect different organs and systems, but also to accelerate pharmaceutical development and clinical trials, while respecting privacy and Intellectual Property rights."*
